Speaker: [Mark Kimmel](#), Author, Investigator, Lecturer

Since 1987, Mark Kimmel, author of "*Trillion, Decimal*," and "*Creating the Cosmic Paradigm*," has studied messages from ETs. By focusing on the messages from ETs, Mark presents an enlightened vision for the future of our planet. Unwilling to ignore the reality of our current devolution, Mark examines its causes and implications.

"From unambiguous ET contact, to abrupt environmental change, to new spiritual realizations, to overt acts by the shadow government—all major happenings—and each a significant event unto itself, are coinciding. This will signal, for better or worse, the end of civilization as we know it."

Since 1975, ETs have predicted what is now becoming apparent: Our planet is self-destructing from a combination of overpopulation, resource depletion, ecological destruction, and a self-centered stalemate. Against this background is the dawning of a new spiritual realization. Old ways of thinking, religions, medicine, corporations and other institutions, will find themselves faced with a new paradigm.

The reality of these predicted events signals the end of life as we know it. The only real hope we have is to embrace the next stage of our evolution—to mature spiritually, to understand who we really are, and to accept the Cosmic Paradigm.

Speaker: David Willis, Reconnective Healing Practitioner, will speak on

"The Reconnection: Experience healing beyond anything you've ever read about, thought about or dreamed about." (The foregoing title includes the comments Reconnective Healing Practitioners have received from people all over the world).

After reading Dr. Pearl's book, "The Reconnection: Heal Others, Heal Yourself," David Willis contacted a Reconnective Healing Practitioner for a Reconnection. This healing started him on a life-changing journey that is still unfolding. He has studied numerous healing techniques, including Reiki, over the past 33 years and has seen some miracles, but since learning how to connect with these new frequencies, he has facilitated miracles in people's lives that are beyond what he had experienced with any other healing work.

David recounts working on a man 82 years old who didn't believe in this "stuff" as he put it, who had what he called "forward head syndrome." Within two sessions, he was able to stand up straight and lie comfortably on the massage table on his back for 40 minutes. A week later he wanted to know how he could work with these frequencies himself. David later worked with a woman for a few minutes at a party. Her arm was hurting and her pain went away after the healing. A week later she reported that another problem she had with grinding her teeth at night had gone away too. The real question is what is the Reconnection and Reconnective Healing and how did it start?

Dr. Eric Pearl ran a highly successful chiropractic practice for 12 years until one day in 1993 after having his axiatonal lines connected to the grid, his patients began seeing angles and reporting miraculous healings from numerous conditions including cancers, birth disfigurements, Cerebral Palsy, and AIDS-related diseases, and the work of the Reconnection had begun.

Reconnective Healing is new on the planet. It reconnects us to the fullness of the universe as it reconnects us to the fullness of our being and who we are. It is thought to be able to reconnect us to the universe and to our very essence, not just through a new set of healing frequencies, but through possibly an entirely new bandwidth. The reality of its existence has demonstrated itself clearly in practice as well as in science laboratories.

Originally the meridian lines, sometimes called acupuncture lines, on our bodies were connected to the grid lines that encircle the planet. These grid lines were designed to continue out into space and connect us to a vastly larger grid, eventually tying us into the entire universe. Over time we became disconnected from these lines.

The reconnection brings in “new” axiatonal lines that enable us to standardize unique vibratory levels and frequencies for healing, and ultimately for our evolution. These axiatonal lines are part of a parallel-dimensional circulatory system that draws the basic energy for the renewal functions of the human body.

The Reconnection brings in and activates these new lines, allowing for the exchange of light and information, the reconnection of DNA strands and the reintegration of ‘strings’, which are simultaneously occurring or parallel planes of existence. Please join SPRE for a fascinating lecture on this new form of healing that is gaining so much attention. For more information visit:

Speaker: **Katherine Skaggs**, Soul-energy Artist, Speaker and Teacher, will speak on: "The Inspiration; Journey of Hopes and Dreams" Including a demonstration of painting a soul portrait in which she connects to the heart/soul energy of the subject.

Katherine Skaggs paints soul portraits, in which she connects to the heart/soul energy of a person, brings forth a matrix of energy and applies it to canvas through color and form to represent the person's highest soul expression. Her paintings are portals to an individual's higher dimensions, allowing them to bring their spiritual energy into consciousness. The result is a beautiful rendition of the soul.

From the time she was a small child growing up in Oklahoma, Katherine was interested in art and studied intermittently throughout her school years, eventually receiving a Bachelor of Fine Arts in painting from the Kansas City Art Institute. She will tell us about the growth influences over a period of years that prepared her to do the spiritual portraiture she does today. Along the way, she studied metaphysics, opened and ran a bookstore and gift shop, called DreamWeaver, in Fort Collins. She then became a graphic designer and finally, spiritual artist.

Katherine will discuss her life growth and awakening to the artistic and spiritual abilities that permit her to paint the soul of an individual. She will bring examples of her paintings to the meeting, and will also demonstrate how she paints a picture of the soul.

At this time in her life Katherine uses her intuitive guidance and inner vision to paint many subjects, including soul portraits and what she refers to as Sacred Art.

Each work is imbued with healing energies to open the viewer to one's own spiritual growth. Katherine's creative works and products from her painting are currently available in Fort Collins at Mother Lode Gallery, Halcyon Connection, and Audra Rose Floral Shop.

According to Katherine, "I am using paint as the vehicle for personal development and spiritual evolution. All the eclectic years make much more sense to me now. I am so happy to create in various ways, and happy that I can encourage others to embrace themselves through their creativity. Today, I am living an incredibly joy-filled life in Fort Collins, Colorado." Join us in hearing this most interesting and enlightening speaker tell us about the joys, sorrows and growth process of becoming a spiritual artist who paints soul pictures. You will also be interested in her compelling portraits of babies, children and animals which are included in the portraits or her subjects. Speaker:

Chau Tran, Advanced Feng Shui Practitioner and Researcher, will speak on: “Feng Shui and our Real Life,” in which he will present the ancient origins and development of Feng Shui over the centuries and how it enhances our lives today.

Chau Tran will begin his lecture with the ancient origins of Feng Shui and dispel the viewpoint that Feng Shui is a myth. Because people do not understand what it is, its purpose and how to use it, many misconceptions are prevalent in society. He will answer questions about Feng Shui’s being understood largely as an ancient Chinese philosophy, and give the many practical uses to which it can be put in our homes, places of work, parks, landscaping and many other everyday uses.

Come and explore this modern approach to traditional Feng Shui, an ancient path of wisdom that we should not ignore and which has much to teach us today.

The main thrust of Chau Tran’s presentation will be how Feng Shui works. If you think you understand how Feng Shui works, you may be surprised by what you hear. It has many uses, many facets and many positive effects on our lives and our health, happiness and comfort. The ways that Feng Shui influences our lives will be clearly explained.

The presentation will include a panoramic view of the various Feng Shui schools and explain the skilled science behind this ancient art. Please come join us for answers from an experienced and knowledgeable Oriental Feng Shui researcher and practitioner of Advanced Feng Shui.

Sunday - May 1; 11am - 12:30pm in the Wicker Room (second floor) at the Masonic Temple, 225 West Oak Street, Fort Collins

Speaker:

Carmen Myrtis-Garcia, award winning Women's Studies Instructor (Master Teacher, Front Range Community College and National Excellence in Teaching and Leadership), Who's Who of American Women 2005 and Who's Who of American Educators 2006, will speak on "Earth Mothers to Daughters of Eve: a Brief Herstory of Women and Religion."

In her lecture, Carmen Myrtis-Garcia will present information about the roles and views of women in religion from the Stone Age Goddesses, through ancient Mesopotamian, Hebrew and Greek societies, to women as followers of Jesus, the view of women by leaders of the Church of Rome, to the present day reawakening of the Goddess spirituality. She will lead the audience through known human history, discussing the changing views and roles of women over thousands of years as spiritual, religious and community leaders or as oppressed members of human society.

Ms. Myrtis-Garcia is the founder of DreamAchiever Productions and Sophia's Tree of Life. She assisted with the development of Women's Studies at the University College of Belize in Belize, Central America, and with the development of the Women's Studies Program at Front Range Community College (FRCC) in Fort Collins. After less than two years of teaching experience there, she was awarded the Master Teacher of the Year. One year later she was a national winner of the Excellence in Teaching and Leadership Award. Her articles are regularly featured in Healing Path magazine.

The author of "*The Other Half of the World; Goddesses and Women in Prehistory, Antiquity and the Middle Ages*," Ms. Myrtis-Garcia has used her book as a class text, receiving numerous awards for her classes and workshops. Her passion for learning and teaching are the inspiration for her student success seminar. Copies of her book will be offered for sale at the SPRE meeting.

Overcoming many adversities throughout her life, Ms. Myrtis-Garcia strongly believes each has been a learning experience. Her desire to turn pain into strength, her determination to reach her goals and her years of research into goddesses and goddess cultures following more than 25 years in an oppressive religion, creates the foundation for her women's empowerment and spirituality workshops and retreats. Her belief that we each have a purpose, are meant to grow in our talents and live our dreams, provides the basis for her energizing motivational play-shops. [Sunday, April 3](#)

Dr. Mark Boyd, ND, Director of Marketing and Development for

Light Sound Therapeutic Technology, will speak on

**“Light Therapy - From Star Trek to Reality”**

Modern technology has created promising avenues in the use of light, sound and color for the maintenance of health as well as in some areas of healing. Research indicates that bio-vibrations from light, sound and color can help increase the production of collagen and promote the synthesis of ATP

(adenosine-triphosphate), an energy carrying molecule in the body. Light vibrations also are known to help heal mouth sores created by radiation and chemotherapy treatments in bone marrow transplant patients, ease chronic pain, and alleviate muscle and bone atrophy occurring in NASA astronauts as a result of long term space flight. Light therapy units are now being carried in some military first aid kits for self-treatment on the battlefield.

Dr. Mark Boyd will discuss the history of light therapy and explain the difference between “hot laser” and “cold laser” technology. How did Light Emitting Diodes (LEDs) come into recognition as a tool for healing the body? What was NASA’s role in developing light therapy? Research indicates that light therapy often promotes pain relief for fibromyalgia, rheumatoid arthritis, tendonitis, carpal tunnel syndrome, neuropathy, back pain, minor stiffness and muscle tension. It also can help reduce stress, anxiety and depression caused by pain, especially when combined with music therapy for relaxing the mind.

Dr. Boyd will also touch on what sound can do to heal the body. As an example, specific tonal beats absorbed into the brain through the eardrum can help to normalize sleep patterns as well as increase intelligence, creativity and intuition. Such innovative sound therapies are presently used in medical clinics that rehabilitate brain injury and stroke victims as well as to treat ADD and ADHD disorders. Sound vibrations either have a calming effect, such as when a lullaby quiets a distressed infant, or they can cause distress and agitation, as when a fingernail is dragged across a chalk-board.

Find out why more people are choosing alternative therapies today in lieu of traditional pharmacological medicine. In his presentation, Dr. Boyd will point out when it is appropriate to rely on pharmacology and when alternative therapy is the better choice. Come and hear this informative talk on vibrational healing with light and sound.

## SPRE SPECIAL EVENT:

Sunday, March 13th “Indigo The Movie”  
Back by demand. Ticket price is \$10

2:30 pm - G.W. Hardin and Indigo guests will speak with a question and answer session to follow.

3:30 pm - Panel discussion of Elders and Professionals with a book signing to follow discussion.

4:30 pm - Showing of “Indigo the Movie” and movie shorts on the making of the movie.

Showing and signing at the Fort Collins Sr. Center, 1200 Raintree Drive in the multi-purpose room. (1 block north and west of the intersection of Drake and Shields.)

Sunday, March 6

**Jo Solem, CBP, CSH** - Independent EMC<sup>2</sup> facilitator, healing counselor, author and workshop leader.

*What the bleep do we believe and how we become what we learn to think about.*

Jo Solem will explain AIM, the powerful, all-inclusive method of balancing the frequencies of the energetic body, making it possible for people to choose to heal themselves. It is a technology that utilizes subtle-energy physics to rebalance the frequencies that can manifest as (so-called) disease because they are out of balance with our natural harmony. To aid the healing process, it is sometimes necessary to gently remove blockages in the body to permit the release and balancing of the healing energy.

The AIM technology enables anyone to counter hereditary and environmental influences that negatively impact health. To do this, we must go beyond our traditional thinking habits and explore advanced possibilities demonstrated by the technology of quantum consciousness and the physics of spirituality.

Jo Solem will also discuss the EMC<sup>2</sup> healing method as explained in Stephen Lewis' book, Sanctuary. She encourages anyone who wants to learn to heal themselves to read Lewis' book-which will be available for purchase at the SPRE meeting. As a practitioner, Jo is well versed in several healing methods. She holds healing workshops to assist people in learning and understanding that they can heal themselves by seeking consciousness and choosing new ways to support the healing process. Those who choose health and healing can become healthy and stay healthy.

Ms. Solem will lead the audience in interactive learning experiences that everyone can take home and use. According to Ms. Solem, we can choose what we think about, and become what we learn to think about. We learn how to breath, what to eat and drink, how to exercise and rest, as well as how much sunlight we need and how best to enjoy it. Learning these healthy practices changes our thinking, and therefore our beliefs. New thinking will create new frequencies and new beliefs so that we become healthy and disease-free. Come join us as we learn from Jo how to heal ourselves.

Sunday - February 6, 2005

**Paul Sterling** - President of the Institute for Business Excellence and Expert on Effective Communication and Communication Coach

*“The Language of Peace”*

Have you ever noticed that the people who are most important to you are often the most difficult to talk to? When you talk to them about issues that are important to you, have you ever noticed the outcome is often misunderstandings, frustration and arguments? Think of the disappointment you feel when you get one-word answers from your teenager, or the upsets that can happen with your spouse that started with

a subtle innocent comment. When you were a child, think of what a certain tone of voice from one of your parents could do to your day.

What are the possibilities for world peace when we don't have the skills to create peace in our own homes? Communication that creates connection, compassion, intimacy and understanding is rare and difficult even with specific skills, tools and lots of practice. Without these tools it is almost impossible. Trying to fix a problem in a relationship without compassionate communication is like trying to fix a computer with a hammer and a chisel; you end up doing more damage than good.

Almost everyone has heard the expression, "It's not what you say; it's how you say it." The problem is that not many people have been taught how to communicate in a way that creates compassion, understanding and a desire to listen. There is a second part of effective communication, which most people haven't heard about: "It's not what you hear; it's how you hear it." Paul Sterling, communication coach, teaches in the "Language of Peace" Seminar, how to effectively discuss and deal with issues that would normally cause communication conflicts in everyday life.

Mr. Sterling teaches these skills and strategies to governments and businesses, and in schools, churches and prisons. He has also used his skills as a U.S. delegate to the Soviet American Citizen's Summit Peace Dialogue in Moscow. He trained with Marshall Rosenberg, the creator of Nonviolent Communication ([www.cnvc.org](http://www.cnvc.org)) and is also trained in Neuro-Linguistic Programming and Neuro-Associative Conditioning. You will want to hear Paul Sterling's lecture on how to say what you mean effectively and to communicate in a manner that will not create misunderstandings and irritations with the ones you love and those with whom you work.

Paul will be teaching a full day workshop in Estes Park, Feb. 26<sup>th</sup> for anyone who would like to learn more about "The Language of Peace." For details and directions please e-mail his office at [CIBE@sprynet.com](mailto:CIBE@sprynet.com).

Sunday - January 30, 2005

(Click on the INDIGO link for more movie information.)

Sunday - January 9, 2005, SPRE Meeting

The Meeting place has CHANGED: Meeting from 11:00 a.m. to 12:30 p.m. in the 2nd floor, Wicker Room of the Masonic Temple, 225 West Oak Street. (Just a few blocks from the Lincoln Center.)

**Franklin Carter**, Long-time UFO Observer and Lecturer;

**“What About Those UFOs? Who is Driving and What’s going On?”**

and

**Keturah McMillin**, Intuitive Healer, will make Additional Comments on **Recent Communications She and Her Co-healers have had with Extraterrestrials.**

Franklin Carter has observed and studied UFOs for many years. In spite of that fact, he still has questions and will raise some of the most baffling and compelling questions with which he deals on a daily basis. Have you or someone you know seen a UFO? You would be surprised by how many people have reported seeing a craft or have been in touch with beings from another planet. Did they tell someone or were they afraid of being ridiculed? How are you dealing with the fact that we are not alone in the universe?

UFO’s have been seen and discussed over many centuries. There are paintings showing UFOs going back as far as the sixteen hundreds. There is controversy today about what is being seen and photographed by our space shuttle astronauts. It is an important subject of investigation, for if only one of the many reported sightings is real, we need to change our thinking about life in the universe. As Richard Hoagland once said, “It only takes one white crow to prove all crows are not black.” Do we have one white crow? Carter believes we do.

Questions that Franklin Carter will address in his lecture include: Are we alone in the universe? Are we in communication with other beings? How many UFO’s are being reported today? Are sightings a US phenomenon only or are UFOs reported around the world? How many people have seen one and believe in them? What do the occupants look like? Who are they and where do they come from? Carter will present photographs of UFOs and the universe we live in. He will attempt to answer the questions that people around the world are asking.

Keturah McMillin will also speak about her recent communications with extraterrestrials (ETs). She and several co-healers have been in communication with ETs and other dimensional beings. She will discuss past agreements that ETs have had with the people of Earth and explain our new world contracts and agreements that she negotiated. A question and answer session will follow. Keturah will have booklets on ETs available for \$5.00 each. Healings will be available to release the old and take on the new.
