For information or to RSVP for the workshop, please call [586-4325] Bring a brown bag for lunch if you like.

"The Secret Journey to the Enlightened Mind" is the fascinating true novel about Dr. Weldon's personal journey and insights into the incredible billion-year-long adventure back to Conscious Perfection and Divine Love. All humanity is on this path.

From the age of five, he was haunted by experiences of past lives and future events of his life, including many out-of-body experiences. The premature death of his father, when he was 13, led him to seek his father beyond the threshold of death, to return only to keep the secret of those adventures to himself for many years.

Tormented by these experiences, at 21 he sought guidance in religion, eastern philosophy and meditation. In 1976, at a gathering including his present and two future enlightened teachers, a gift was given to him of a direct vision of the final human state of perfection and the nature of the planes of existence. This experiential gift was given by a mysterious being during a journey ending on the highest level of creation. It has taken 35 years and the guidance of three of the world's greatest living Masters to comprehend and integrate that experience.

An important culmination of this journey occurred in Rishikesh, India in 2006, after the world's largest single meditation gathering of 2½ million people. Please join us as Dr. Weldon shares his personal story and traces a unique perspective of the stages, steps and experiences back to completion and fulfillment.
